

A new way to apply for school transport for the school year of 20/21

We want to remind you that you, as a guardian with children in primary school, except for pupils in special school, can apply for school transport using our new e-service. No school cards will be sent out or recharged if you have not made an application.

The application for the upcoming term should be made during April 1 – 15, to ensure that a decision regarding school transport has been finalized in time for the start of the new school year in August.

The e-service will be available at the Municipality's home page from April the 1st, and you can log in using an eID. If you do not have an eID, you can get one from your bank.

Presently pupils placed in family homes and persons with a temporary personal identification number will need to apply using a form that is available to get at your school.

The goal of this change is, among other things, to achieve better planning for bus traffic, and therefore reduce the impact on the environment, as well as reducing costs.

Anyone who may have questions, can already now contact the project manager or the school bus administrative official by e-mail.
