

Information about the Coronavirus

The Coronavirus can make you sick.

The Coronavirus can cause coughing, give you

a sore throat, headache and the sniffles.

The Coronavirus may also cause a fever.

Some people may have a hard time breathing.

The Coronavirus is infectious.

When you cough the Coronavirus may infect

other people.

Because of this, it is important to cough in

the bend of your arm.

The Coronavirus may be infectious when you are

close to other people.

Because of this, it is important

not to be around too many people at the same time.

It is also important that you do not hug

or shake other people's hands.

You should not touch your face with your hands.

The virus may also infect if you touch things.

Because of this it is important that you often

wash your hands with soap and warm water.

Dry your hands with a paper towel.

Dispose of the paper towel in a waste basket.

If you have a headache or sore throat, you should stay

at home.

If you have a cough, the sniffles, or are feverish you should also

stay at home.

This makes it harder for the virus to infect people.
