

Agahî ji bo vîrusa Corona

Vîrusa Corona dikari te nexweş biki.

Vîrusa Corona dikare bi tere quxikê çêke, û qirika te biêşîne.

Ser êşîyê û persîvê çê bike.

Vîrusa Corona her dikari taya (agirê) te bilind bike.

Hinek însan dikarin astengîyên dan û stendina nefesê bigrin.

Vîrusa Corona mirov dikari jihev vergiri.

Dema kû tu bi quxi dikari vîrusa Corona derbasî kesan biki.

Însanên din.

Bo vê yekê girîngi kû, dema tu bi quxî çengê xwe bid ber.

Vîrusa Corona tu kari jî nêzîkîyên bi têkilîyên însanan ve bigiri.

Ji ber van sedeman gelekî girîngi kû

Bi gelek însanan re li cem hev nemîn.

Gelek girîngi kû tu mirovên din hêmbêz meke.

Anjî bi destên însanên di megre.

Her wisa destê xwe med ser û çavên xwe.

Bi girina destê xwe li ser tiştan, mirov dikari vîrusê bigiri.

Ji ber vê yekê dive tu gelek caran destên xwe bişo.

Bi sabûn û ava germ.

Destên xwe bi serwetên kaxet ve zûwa bik.

Dûvra serwetên qaxet têke hundûrê selkan kaxetan.

Ger serê te û qirika te biêşe dive tu li mala xwe bimîni.

Di maldebe.

Ger quxik, persîv anjî taya te hebe divê tu li mal bimîni.

Di maldebe.

Wê demê ji bo vîrusê wê astengî bibe, û nikare derbasî însanan xwe belavke.
